📍 Mankilam, Tagum City, Davao del Norte

PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Developer with demonstrated experience building enterprise-grade systems, mobile applications, and cloud-integrated platforms. Skilled in architecting and delivering end-to-end solutions — from database design and RESTful APIs to responsive frontends and real-time mobile apps. Experienced across PHP/Laravel, Kotlin/Java (Android), Java Desktop, and modern JavaScript frameworks. Proven track record in freelance project delivery, government internship, and corporate system development. Works across multiple domains including POS/inventory, HR/payroll, logistics, cooperative finance, and ride-sharing.

TECHNICAL SKILLS

Languages:	PHP, JavaScript, Kotlin, Java, Dart (Flutter), VB.NET, C#, HTML, CSS, SQL	Backend:	Laravel 8/11, Livewire, Filament Admin, RESTful APIs, JWT Auth
Frontend:	Vue.js, React, Quasar, Bootstrap, Blade Templates, Pinia/Vuex	Mobile & Desktop:	Android (Kotlin/Java), Flutter, React Native, Java Swing/JavaFX, VB.NET, C#
Databases:	MySQL, PostgreSQL, SQLite, Firebase Realtime DB, Firestore, Supabase	Cloud & APIs:	Firebase, Google Cloud Storage, Cloudinary, Supabase, Google Maps/Sheets/Calendar API, PayMaya, Nexmo/Vonage SMS
Tools:	Git, VS Code, Android Studio, NetBeans, XAMPP, Postman, DomPDF, PhpSpreadsheet	Other:	Networking, Hardware Technician, IoT Prototyping, System Documentation, Client Training

WORK EXPERIENCE

System Developer / Web Developer

Aug 2025 – Mar 2026

TL Mabuhay Group of Companies

- Developed and maintained the **Quarry Management System** using Laravel, Livewire, and Filament — handling materials tracking, vehicle assignments, operations logging, and daily production reporting.
- Built the **Mabuhay Printing Press Management System**, covering job order management, client tracking, production scheduling, and printing job status monitoring.
- Designed and managed the **MySQL database** schema and migrations for both systems, ensuring data integrity across operations.
- Delivered responsive, cross-device UIs using Blade, Livewire, and Bootstrap.

Programmer (Internship)

Mar 2025 – Jul 2025

City Hall of Tagum – Programming Department

- Designed and developed the complete full-stack **Job Management System**, including database schema, migrations, API endpoints, and role-based authentication.
- Built a dynamic **Vue.js + Quasar** admin interface for job listing creation, editing, and management with role-based access control.

- Developed the **Job Viewing Kiosk** frontend — a real-time public kiosk interface supporting job browsing, filtering, and detailed job display for walk-in users.
- Delivered complete technical documentation and conducted user training for department staff.

Freelance System Developer Self-Employed

2021 – Present

- Delivered multiple end-to-end custom software solutions for various clients across web, mobile, and desktop platforms — from scoping and estimation to deployment and ongoing support.
- Translated client requirements into working deliverables, produced system documentation, and provided on-site training and maintenance.

POS & Inventory System *(Laravel 11, Livewire, Filament, MySQL, Supabase)*

- Developed three integrated web applications: a
Restaurant POS System
(order management, tables, shifts, payments, discounts), a
Restaurant Inventory System
(ingredient tracking, recipes, stock alerts, purchase orders, supplier management), and a
Farm Management Page
(produce tracking, harvest records, and farm-level reporting).
- Implemented
offline-first architecture
with Supabase PostgreSQL cloud sync via a custom sync queue, enabling uninterrupted operations during connectivity loss.
- Integrated Cloudinary for media management and built role-based access control with audit logging.

Laundry Express – Mobile Laundry Delivery App *(Kotlin/Java, Firebase, Android)*

- Designed a multi-role Android app connecting customers, riders, partner laundry shops, and admins with real-time order tracking and
Firebase Cloud Messaging (FCM)
push notifications.
- Integrated
Google Maps API
for navigation, phone number verification, and Cloudinary for media uploads.

Hakot – Ride-Sharing Platform *(Laravel, Firebase, PHP, JavaScript)*

- Developed backend APIs for a ride-sharing platform using
Firebase Realtime Database
for live location and trip management; secured with
JWT authentication
.
- Built trip management, driver/passenger dashboards, rating/review system, and real-time notifications.

LoanApp – Cooperative Loan Management System *(Java, Firebase, Swing/JavaFX)*

- Built a Java desktop application for cooperative loan and member management following
MVC architecture
.
- Features include loan disbursement, payment tracking, member ledger, and dashboard reporting backed by
Firebase Realtime Database
.

VB.NET POS Systems & IoT Prototypes *(VB.NET, SQL Server/SQLite, Vue.js)*

- Developed and maintained POS desktop systems with barcode scanner and thermal printer integration; delivered SPA dashboards with Vue.js and Pinia state management.

PROJECTS AT A GLANCE

Project	Platform	Tech Stack
Quarry Management System	Web	Laravel, Livewire, Filament, MySQL
Printing Press Management System	Web	Laravel, Livewire, Filament, MySQL
Restaurant POS & Inventory System	Web	Laravel 11, Filament, Supabase
Farm Management System	Web	Laravel 11, Filament, MySQL
Laundry Express	Android Mobile	Kotlin, Java, Firebase
Hakot Ride-Sharing	Web / API	Laravel, Firebase, PHP
LoanApp	Desktop (Java)	Java, Firebase, Swing
Job Management System	Web	Laravel, Vue.js, Quasar
Payroll System	Web	Laravel, MySQL
VB.NET POS Systems	Desktop	VB.NET, SQL Server

EDUCATION

Bachelor of Science in Information Technology

University of Mindanao College Tagum
2021 – 2025 | Graduate

ICT Major in Mobile App & Web Development

STI College Tagum
2019 – 2021

High School Graduate

Assumpta School of Tagum, Inc.
2016 – 2019
